'The Evening World's" Suggestion, About It May Be Acted Upon.

The Need of Such a Committee Is Very Apparent.

No Likelihood of the Route of the Parade Being Changed,

The suggestion made by THE EVENING WORLD of yesterday that the Centennial Committee had overlooked an important matter in connection with the Celebration in neglecting to appoint a Committee on Public Comfort to direct strangers in the city where they might secure board and lodgings, has already borne fruit. One of the committeemen said this morning to

a reporter of TRE EVENING WORLD: The idea is an excellent one, and the Exec ntive Committee will have put it into speedy execution. In fact they are considering the matter now, and steps will probably be taken early next week to get the bureau into active

working order. "Something of the kind must be done, and the Committee at first thought the Hotel-Keepers' Association would look after the matter.

ers' Association would look after the matter. They have refused, however, to undertake it, and now it naturally falls upon us."

'It is rather hard," said another member at the Committee's headquarters this morning, "to put any more work on our shoulders, for we have about all that we can attend to now. But I suppose it must be done."

The matter will be discussed and decided upon to-day at the mesting of the Committee on Plan and Scope.

From blat time on the chief work, of the elevi-

and Scope.
From the time on the chief work of the cleri-cal corps at the Centennial Committee's head-quarters will be the distribution and mailing of invitations and tickets to the guests invited to attend the celebration.

EEEPING DOWN THE COMPLIMENTABLES.

This is no easy task, for, although the Committee has tried hard to keep down the number of complimentaries to the bail and banquet, in order to give bons fide purchreers a chance, the deadhead list numbers about two thousans for the bail and supper and 600 for the banquet.

It was announced by Mr. Bowen some time ago that every member of the Committee of Two Hundred expected to pay \$15 for his ticket to the banquet, and as there are places for only 800 at this feast the natural inference is that no one outside of the 600 guests and the 200 committeemen will get more than a whiff of the odor of the great chef's choice viands from some distant box or seat in the cock-loft, while Mr. McAllister's Geisler and Moetet Chandon importations will be entirely out of the question as palse-ticklers.

Whether the members of the Committee have yet provided themselves with tickets remains to be seen, but it is said their applications were the first to be piaced on file with the late Secretary of the Entertainment Committee, and in that case it is hardly probable that they will get left. EREPING DOWN THE COMPLIMENTABLES.

BIGHT TICKETS IN THE SET.

The complete set of tickets to all the various events of the three days' celebration numbers eight, and they are printed in different colors and designs in order that holders may make no mistake and try to, work the banquet gatekesper with an art exhibition ticket, or the grand stand with a pasteboard admitting one to the religious services at St. Paul's.

The colors and designs were originated by the Chairman and Secretary of the Art Committee in collaboration, and are as follows, each bearing a medallion head of Washington in low relief:

Recoption at Equitable Building—Old gold.
Naval Parade—Dark blue
Ball—White, with gold medallion.
Ball—White.
Military Parade—Light blue.
Industrial Parade—Blood red.
Art Loan Exhibition—Pink.
Services at St. Paul's—Lavender.
Literary Exercises—White, in circular form.

The refusal of the Committee to take any action upon the request made by the Legislature to change the line of march so as to pass through Union Square instead of going down Waverley Place to Washington Square, has aroused considerable dissatisfaction, especially among the Naval Committee.

It has been claimed all along that if the procession should pass through Union Square it would give an opportunity to thousands of people who have no chance of obtaining seats on the grand stands to get a good view of both parades.

OBJECT TO A CHANGE.

OBJECT TO A CHANGE.

The Committee, however, say that any change in the line of march now is out of the question, because the grand stand and arch at Waverley place are now erected and all arrangements have been made to have the procession pass down that way.

The Army Committee say that the rounding of Union Square would be a nuisance, and, besides, that it would be very hard for the troops, and they want to make it as easy as they can for the soldiers, who have at best a tedious day before them.

The most recent kick against the hard-pushed Centennial committeemen comes from the Brooklyn Board of Alderman, who think that they are deservingfof the same courtesies as were shown to the New York City Fathers and the Legisla-

treated.

If they cannot make the Committee listen to their protests they are coming over here to build a grand stand of their own on Broadway. They say that the New York Aldermen will see that they get their rights to this extent at least, although they feel themselves entitled to ball and banquet tickets as well.

Col. R. Van Rensselaer Cruger said this morning that there was no probability that the line of march would be changed, and that all the Army Committee could do was to respectfully decline to grant the request of the Legislature expressed in the concurrent resolution passed yesterday.

The Governors of all the States in the Union with the exception of Tennessee, Floride, Texas, West Virginia, Kansas, California, Nevada, Dakota and Louisiana have accepted the invisation of the Committee and have signified their intention to be in New York during the celebration.

It is settled.

"No beer !" The Sophs of Columbia will celebrate their "Triumph" next June without the libstions which were ever poured out on this festive event to Gambrinus.

Last year the class of '90 set the dreadful example of docking the beer. When the question came up among this year's Sophs, it was agitated with excessive ardor, and the vote was a tie. All the class were not there, however, and the President settled a vote for postponement by casting a vote which tipped the beam. This was regarded as affording the most soothing hopes for beer.

Alas! When the meeting took place yesterday the same number waspresent, and apparently the same members, for it was seen before the vote was teken that the "wets" were no more than the "drys. The most excited argument was carried on, and a thrilling invective against the use of beer was induiged in by an ardent

A tearful 'wet" thought he had discovered
the best rejoinder to this fatal eloquence in the
appearance on the 'Campus' of three of the

class who were all thought to be "wets." He eagerly hailed them and they were hauled in and bid to vote.

They voted.

Every one of them voted "dry" and the "Sophs" will cremate their Legendre without the glad flow of beer which used to make that ceremony a doubly interesting one.

There is one side to this so hotly contested "To beer, or not to beer question" which will knock off the temperance color which it seems to wear. The Sophs of this year are perhaps as fond of beer as any Sophs who ever drank, and are as capable of stowing away as much of the genial brew under their waistcoats as any of their predecessors.

But the beer on the occasion of the "Triumph" meant beer for the College, not the class only. The Sophomores "set em up" on this occasion for their brother collegians. This was a charming arrangement except that the Sophs got no more beer, and no more fun than any-body else, but a lot more bill.

"Ah, there the rub"—perhaps.
Sadness follows upon sadness. The College authorities refused the boys the use of the "Campus" if they had beer at their Triumph. But now it turns out they can't have the beer or the "Campus," The "old building," which the college authorities consider as inflammable as the heart of a Freshman, would be endangored by any adjacent combustion.

So the use of that soragy bit of ragged ground with its weary little blades of stely grass is denied them. Probably they will "Triumph" on the Manhatan Athletic grounds. The "Triumph" doesn't look as triumphant as could be desired.

The window was open a little and the April zephyrs lightly tossed the lace curtains.

NOT AN UNUSUAL STORM.

Sergt. Dunn Says Last Night's Cyclone Is Common at This Season.

Sergt. | Dunne, United States Clerk of the Weather, headquarters on top of the Equitable Building, emerged from a mass of maps and reports this morning, and said to an EVENING WORLD young man that there was nothing unusual about last night's storm.

It was one such as we might expect at this sea-son of the year. They had it all through the son of the year. They had it all through the West and Pennsylvania, and it was the result of the studen cooling off of the warm atmosphere of yesterday.

To-day the indications are for cooler and fair weather. Reports show cool weather throughout the northern parts of the courty, and warmer in the southern portion. The temperature this morning in this city was 44 degrees above zero, at Chicago, 38; St. Louis, 54, and New Orleans, 66.

Sault Ste. Marie, Mich., is the coolest place to-day, and Point Jupiter, Fla., the warmest. High northerly winds prevailed this foremon from Cape Hatters to Boston, and storm signals are up from New York to Wood's Holl, on the Massachusetts coast.

At noon Meredith stripped for the jump. He put on a pair of blue silk trunks, leaving him bare above the waist. A pair of slippers protected his feet.

At 12.30 he shouted "good-by" and leaped high in the air.
As his form shot through space he was seen to double his body up like a ball and struck the water with a mighty splash.

He came to the surface apparently unharmed, and was yanked into a boat by his friends. He did not breathe for half a minute and bled a little at the mouth.

There was not an abrasion of the skin as the result of his leap, and he said he felt all right. He returned to Uncinnatiand was at work yesterday.

There was not an abrasion of the skin as the result of his leap, and he said he felt all right. He returned to Cincinnati and was at work yesterday.

He now claims the championship because he says that he tried to get a match on with Steve Brodie while in New York some months ago and the latter refused.

Au Evanya World reporter called on Brodie at his saloon to-day.

"In the first piace," said Brodie, "I want it distinctly understood that I have never been challenged by any mortal man. I have never seen or heard of Meredith Stanley and there is no record of his being a bridge jumper."

"Do you believe he jumped?"

"I do not. It is an impossibility for a man to imp 285 feet into water only 12 feet deep. The report says that going down he doubled himself up like a bail. That is another impossible feat, for a man going through the air has no control over himself whatever."

"It is said that his skin was not even broken. How about that?"

Brodie laughed. "That is absurd, and it makes me doubt the jump. Why, when I jumped from the Brooklyn Bridge, only 148 feet. His skin was iplif and torn to pleces. But if Mr. Stanley wants my belt he can have it when he proves that he can beat me, and I should like to insert my challenge in The Evensino Wonld."

Brodie wrote it out and here it is:

The Aller Did Not Rescue the Danmark's Passengers.

Fears That the Unfortunate 700 Have Been Drowned.

A List of Those on Board Received in This City To-Day.

Painful Auxiety of the Friends of the Missing Emigrants.

SEPRETAL CABLE TO THE EVENING WORLD LONDON, April 13 .- Still nothing is at hand o allay the fears of those interested in the teamer Danmark, news of whose being found abandoned in midocean came yesterday.

There is great excitement at the Danish and wedish ports, and the offices of the agents in this city are the scenes of distressing outbroaks on the part of despairing friends and relatives of those on board.

Capt. Bond, of the City of Chester, which sighted the abandoned vessel, believes, in spite of all discouraging opinions, that the passengers and crew are rescued.

He bases this on the fact that all the Dannark's boats were gone.

A chain cable is now reported to have been seen langing from the Danmark's bow, and this leads Capt. Bond to believe that the Danmark was in tow of another vessel.

Two vessels that sailed over the ocean in the vicinity of where the big steamer Danmark was sighted by the City of Chester, arrived to-day, and neither bring any tidings concerning the fate of the 700 souls that were on board the wrecked vessel.

The Britannic's arrival with no news increased the fears of the relatives of those on board, and hope became harder to entertain this morning when the North German steamer Aller arrived without brinning any news of the missing people.

pile.

The offices of Funch, Edye & Co., agents of the Thingvalia Line in this city, were visited this morning by accres of people in search of missing friends and relatives.

Mr. Edye received several telegrams from Western cities making inquiries concerning the safety of the vensel. & D. Barkelow, of Omaha, Neb., sent a depatch, asking whether Benedikta Persons had safed from Maleno, Sweden, and whether she had been soved.

Persons had sailed from Maleno, Sweden, and whether she had been soved.

A glance at the list showed that she had sailed. A great many neopie who called at the passenger office on State street this morning shook their heads saily when told there was no news and then walked away.

One woman who was early at the office and for hours paced up and down on the sidewalk was Mrs. Celia Neilison, of the Oakland House, Fort Hamilton. She had received a letter, and later on a telegram, from Carl Lund, in Cache Comuty, Utah.

His wife, Marie Louise, who is a cousin of Mrs. Neilison, and her two children are among those who sailed from Copenhagen.

Mr. Funch, of Funch, Edye & Co., the agents in the city, is still firm in his belief that the passengers have been picked up by a passing vessel, and expects to hear of their safe arrival at some port any minute.

He thinks it unurobable that, if they were at some port any minute.

He thinks it improbable that, if they were compelled to leave the vessel, they would leave the immediate neighborhood of the wreck, and for that reason he thinks they have been rescued

The mails from the White Star steamer Britannic were distributed this morning and contained a letter for Funch. Edge & Co. containing a list of the passengers who were on board the Danmark.

Steamers of the White Star line sail between Norwegian Swedish and English ports regularly every week, and it was by that means of transportation the letter was sent from Christiana and Christiansand to London.

Thence it was sent overland to Liverpool in time to catch the steamer Britannic, which left that port ou April 3.

The lists contain the mames of all the passengers on the Danmark except those who came from Norway. They are here given, those whose destination was New York being given paorts. THE PASSENGER LISTS.

During his voyaging he called at Samos, where he had a long conversation with The World's representative, Mr. Klein.

Finally, coming to Honolulu, Mr. Stevenson took a cottage and found his life so happy and free that he has himself described his surroundings as those of "a heaven upon earth."

HERBERT BEECHER IN TROUBLE.

He Is Indicted with Others for Robbing Ship-Masters and the Government. INPECIAL TO THE EVENING WORLD.

PORTLAND, Ore., April 13, -The indictment of William Harndon, ex-Special Deputy Collector, and Quincy A. Brooks, of the Custom-House at Port Townsend, W. T., follows investigation which have disclosed a wide range of fraudulent operations, including extortions from incoming and outgoing vessels, the removal and destruc-tion of public records and the falsifying of ac-

counts.

Warrants were issued for the arrost of Beecher and Harndon to-day. Brooks is in Washington. Charges of crookedness had been made by the press and taken up by the public, and official investigation by agents from Washington resulted.

Hardman Hall was filled last night with a very arge audience notwithstanding the inclemency of the weather. The occasion was the first appearance of a young Swedish tenor, Eugene de pearance of a young Swedish tenor, Eugene de Danckwardt, of the Royal Opera, Stockholm.
Mr. Danckwardt was greeted with hearty applause in his selections. His voice is of great firmness of tone in the upper register, and although he had the good taste to avoid any sensational exhibition of high notes, he took those which came in the score with masterly case. His method is good and the timbre of his voice excellent. Mr. Danckwardt has much to congratulate himself with on has evening's success. He was assisted by Miss. Ohrstrom, Miss. Goodrich, Mrs. Toplita and Mr. and Mr. Carl Mertin.

A BRILLIANT GAME PROMISED FOR BROOK-LYN'S WASHINGTON PARK.

To-day's game between Brooklyn and New

York promises to be as fiercely fought as were he two previous ones. The fact that the winning club pockets all the gate receipts compels both Managers Mutrie and McGunnigle to do some tall hustling in order

that the strongest possible teams may be put into the field.

Mr. Murie went to Boston last night and tried to get Ed Crane to return with him and pitch the game, but Healy was not with the combina-tion and Jim had to return home without the tion and Jim had to return nome wanted the pitcher.

"But," said New York's manager, "I guess we'l get there, for Tim Reefe is going to pitch and Ewing will catch him. I don't know that Keefe has signed yet, but he has consented to work to-day. Hatfield will play short, and the make-up of she rest of the team you know as well as I, for I haven't decided positively what outfield I shall play."

"That the Bridegrooms will do their best to win no one doubts, and the sports of Brooklyn are eagerly accepting bets at evens.

A big crowd is looked for at the park to learn an answer to the question, "Can't Brooklyn win one game?" THE NIPSIC FLOATS AGAIN.

BUT HER RUDDER IS GONE, AND IT IS DOUBTPUL IF SHE CAN COME HOME.

IBY CABLE TO THE PRESS NEWS ASSOCIATION 1 SYDNEY, Australia, April 13.—The German man-of-war Olga, which was saved from the general wreck and repaired, has arrived at this oort from Apia.

She brings news that the United States steamer Nipsic was pulled off the reef and floated, but she has lost her rudder and is other-wise so badly injured that it is doubtful whether she will be able to return home, as the material and means for making the necessary repairs are

and means for making the necessary repairs are wanting.

The Trenton is full of water and cannot be asved.

The position of the German steamer Adler is unchanged. She is a hopeless wreck. Her guns only can be saved.

The officers of the Eber and the commander and two other officers and thirty scamen of the Adler came here on the Oiga.

The steamer Rocton proceeds to Samoa to convey the crews of the American ships to San Francisco. cisco.
